Postgraduate Diploma in Full Stack Software Development

2023 - Present

Lambton College, Toronto, Canada

- Hands-on experience in front-end and back-end development using technologies like JavaScript, Java Swing, Django, .NET, and MySQL.
- Focused on developing scalable web applications with modern frameworks and databases.
- Participated in team-based projects to simulate real-world software engineering workflows.

BSc Computing Software Engineering

2017 - 2020

NAMI College (Affiliated to University of Northampton, U.K), Kathmandu, Nepal

• Learned advanced principles in software engineering, focusing on coding standards, software development life cycle (SDLC), and object-oriented programming (OOP).

- Gained in-depth knowledge of database management systems and web application development.
- Worked on real-world projects, utilizing Codelgniter for building full-stack applications with a team.
- Participated in a cooperative work experience, applying learned skills professionally.
- Completed a solo dissertation on a fully working Android application, applying the knowledge gained.

WORK EXPERIENCE

Manager

November 2023 – Present

Bhojan Ghar, Toronto, Canada

- Managed operations, employee schedules, and customer service for a high-traffic restaurant.
- Implemented a POS system, reducing transaction errors and streamlining payment processes.
- Oversaw inventory management, supplier relations, and issues handling.

IT Support

November 2022–March 2023

Home Tuition Nepal, Kathmandu, Nepal

- Provided technical support to clients seeking tutoring services and troubleshooting software and hardware issues.
- Configured and maintained the agency's internal databases for customer information.
- Assisted in developing a web-based system to manage tutor and student interactions.

Intern – Software Developer

May 2019 – August 2019

NAMI College, Kathmandu, Nepal

- Developed an Employment Management System for the college using the Codelgniter framework and MySQL.
- Collaborated with a team to build features that tracked student employment opportunities, applications, and job placements.
- Conducted system testing, debugging, and quality assurance to ensure the platform's functionality and reliability.
- Improved the system's user interface for easy navigation by students and administrators.

VOLUNTEER WORK

Event Technical Support

March 2024 – May 2024

Hyolmo Society of Canada, Brampton, Canada

- Coordinating the 2568th Buddha Jayanti celebration event in Toronto, scheduled for May 25, 2024.
- Provided technical support by managing backend issues and ensuring smooth operation of digital platforms for events.
- Handled documentation of event activities and system processes, ensuring accuracy and accessibility.
- Designed graphics for event promotion, enhancing the society's digital presence.
